PROFESSIONAL EXPERIENCE

Synchrony Financial, CT, US

Jan 2025 - Current

Financial Analyst

- Improved forecast accuracy by 18% by reconciling SQL-based actuals with SAP FICO data and updating Excel models, ensuring variance clarity in monthly forecasts and quarterly business reviews.
- Automated Excel templates using Power Query, VBA, and ERP data extracts, cutting reporting effort by 30% and increasing consistency across business finance deliverables.
- Built DCF and IRR models for internal project evaluation using SAP financial data, helping drive investment decisions that enabled 20% cost optimization across analytics, marketing, and digital operations.
- Designed Power BI dashboards with live ERP connectors for OPEX and revenue tracking, reducing ad hoc report requests by 45% and enabling real-time KPI monitoring.
- Detected and resolved reporting errors by reconciling SAP general ledger data with budget assumptions, enhancing monthly close accuracy and variance tracking.
- Prepared headcount reports, cost variance commentaries, and revenue files using SAP HR and FI modules, improving financial transparency and cutting review cycle time by 25%.
- Wrote SQL-based checks on forecast inputs and SAP datasets, flagging outliers and reducing budget reconciliation errors by 40% during reporting consolidation.

Mohit Reddy and Co LLP, India

Apr 2022 - Jul 2023

Accountant

- Shortened month-end close by 25% across clients by standardizing journal entry templates and leveraging ERP accounting tools for streamlined trial balance generation.
- Filed 100+ tax returns with 100% accuracy using compliance data sourced from internal ERP systems, ensuring audit readiness and avoiding penalty exposure.
- Reconciled fixed asset and inventory records using SAP FICO modules, identifying discrepancies and resolving 95% of variances ahead of audits.
- Processed payroll and vendor payments via ERP workflows, improving record accuracy by 30% and preventing duplicate entries using Excel and system validations.
- Completed incorporation filings and annual returns for 15+ companies, integrating ERP accounting records with MCA regulatory submissions.
- Collaborated with audit teams by preparing schedules, validating SAP ledger entries, and resolving flagged issues—addressing 90% of audit queries before escalation.

Razorpay, India

Aug 2020 - Mar 2022

Financial Analyst

- Used SQL to identify payout mismatches across transaction records, reducing reconciliation errors and supporting more accurate settlements during daily and monthly finance operations.
- Created Tableau dashboards to visualize chargebacks, transaction volumes, and processing fees, improving visibility and reducing manual reporting errors across monthly finance deliverables.
- Built IRR models to assess new product features, increasing accuracy of return projections by 22% and enabling better prioritization during early-stage investment planning.
- Reconciled payout entries during monthly close by matching Excel records with accounting data, resolving mismatches and maintaining accurate final reports.
- Prepared audit support files including transaction logs and fee breakdowns, reducing review delays by 35% by ensuring all required financial documentation was organized and accessible.
- Maintained Excel trackers for payout timelines and transaction delays, enabling the operations team to resolve 40% of cases faster by flagging recurring service gaps.
